PROFILE

AI & Data Science undergraduate with hands-on experience in Python, SQL, machine learning, predictive analytics, and AI-driven applications. Experienced in building data pipelines, predictive models, feature engineering, anomaly detection, and GenAI/RAG systems, with a focus on translating data into actionable business insights and automated solutions.

SKILLS

Programming: Python, SQL, C++

ML & Analytics: Machine Learning, Deep Learning, Regression, Statistics, EDA, Feature Engineering, Data Cleaning, Data Validation, Anomaly Detection, Hyperparameter Tuning

AI / GenAI: Generative AI, NLP, RAG, LLM Applications, FAISS, Sentence Transformers, Presidio, spaCy

Libraries: Pandas, NumPy, Scikit-learn, OpenCV, Flask

Tools: Power BI, Excel, SQLite, Git, AWS, Ollama, GitHub Actions

EDUCATION

- K. K. Wagh Institute of Engineering Education & Research** Nashik, India
B.Tech in Artificial Intelligence and Data Science Expected 2027
- Relevant Coursework:** Machine Learning, Deep Learning, Data Science, Generative AI, Natural Language Processing (NLP), Business Intelligence & Analytics (BIA), Database Management Systems, Artificial Intelligence, Data Structures & Algorithms

PROJECTS

- MetricIQ – Automated Data Pipeline & Business Analytics**
Built an automated analytics pipeline tracking **8 business metrics** with **30-day baselines** and **3 comparison windows** (daily, 7-day, 30-day). Implemented anomaly detection using **10%, 20%, and 30% thresholds**, integrated LLMs for executive insights, and automated daily reporting through GitHub Actions and SMTP. *Python, SQL, SQLite, Anomaly Detection, LLMs, GitHub Actions*
- ContractLens – Privacy-Safe AI for Legal Risk Detection**
Built a RAG-based AI system providing **0–100 clause risk scores** across **3 risk levels** (Low/Medium/High). Implemented PII detection and masking for sensitive identifiers before downstream processing, generated document embeddings, and built FAISS-based context-aware retrieval for legal risk classification. *Python, SQL, RAG, NLP, FAISS, Presidio, spaCy*
- Car Price Prediction – Predictive Analytics Pipeline**
Built and deployed a Random Forest regression model on **17,063 car records**, achieving **0.8823 R²**, **117,872 MAE**, and **371,015 RMSE** after GridSearchCV tuning. Developed the complete preprocessing, feature engineering, encoding, training, evaluation, and Flask deployment pipeline. *Python, Pandas, NumPy, Scikit-learn, Flask, GridSearchCV*
- IPL Match Data – Data Analysis & Power BI Dashboard**
Cleaned and standardized IPL match data, handled missing and duplicate records, engineered total-runs and run-rate features, and performed exploratory analysis across teams, winners, and venues. Built an interactive **Power BI dashboard** to visualize match performance and derive data-driven insights. *Python, Pandas, NumPy, Power BI, EDA, Feature Engineering, Data Visualization*

ACHIEVEMENTS

- Registered Design Patent – Government of India:** Co-designer of “*Legal Case Tracking AI-Device*”, registered with the Design Office, Intellectual Property India (Design No. 461520-001, Class 14-02), originating from the ContractLens project.

CERTIFICATIONS

AWS Cloud Practitioner

MKCL Advanced Excel

MKCL Digital Marketing

EXTRACURRICULAR ACTIVITIES

- Social Media Head, TEDxKKWIEER:** Led social media strategy and content, reaching **300K+ people** and generating **4M+ views**.
- Social Media Lead, Phoenix KKW Club:** Contributed to social media strategy, content creation, and digital outreach for club initiatives and events.
