PROFILE

AI & Data Science undergraduate with hands-on experience building machine learning, NLP, RAG, computer vision, and data-driven applications. Experienced in Python, Scikit-learn, SQL, FAISS, LLMs, and data preprocessing, with practical experience developing privacy-preserving AI and intelligent automation systems.

EDUCATION

- **K. K. Wagh Institute of Engineering Education & Research** Nashik, India
• *B.Tech in Artificial Intelligence and Data Science* *Expected 2027*
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Database Management Systems, Artificial Intelligence, Operating Systems

PROJECTS

- **ContractLens – Privacy-Safe AI for Legal Contract Risk Detection:** Built a RAG-based system that identifies high-risk clauses across employment, rental, loan, and NDA contracts and explains them in plain language. Owned the privacy layer and backend architecture by designing a PII detection and masking pipeline using Microsoft Presidio, spaCy, and Regex before sensitive data reaches the LLM. Embedded clauses using Sentence Transformers, indexed them in FAISS, and implemented context-aware retrieval for risk classification. *Python, LLMs, RAG, FAISS, Sentence Transformers, Presidio, spaCy, PyMuPDF*
- **Attendify – Dual-Verification Smart Attendance System:** Built an automated attendance system using face recognition and Wi-Fi device verification, marking students present only when both checks pass. Worked as ML & Data Engineer by training and tuning FaceNet-based face recognition, cleaning enrollment data, and developing the MAC-address and database pipeline for verification. *Python, OpenCV, FaceNet, Flask, SQL*
- **DhawalKart – AI-Powered Automated Daily Business Analyst:** Developed an autonomous e-commerce business intelligence system that generates realistic metric streams, stores data across SQLite and CSV, and runs deterministic multi-period anomaly detection in Python. Integrated local LLMs (Ollama) and offline fallback logic to interpret anomalies and auto-generate executive business summaries. Deployed via GitHub Actions for daily automated analysis and SMTP HTML report dispatch. *Python, SQLite, Ollama, LLMs, GitHub Actions, SMTP, CLI*
- **Car Price Prediction Model:** Built an end-to-end regression pipeline for used-car price prediction. Performed data cleaning, categorical encoding, outlier handling, feature engineering, and hyperparameter tuning to improve model performance over a baseline. *Python, Pandas, NumPy, Scikit-learn*

ACHIEVEMENTS

- **Registered Design Patent – Government of India:** Co-designer on “Legal Case Tracking AI-Device”, registered with the Design Office, Intellectual Property India (Design No. 461520-001, Class 14-02), originating from the ContractLens project.

SKILLS

- **Languages:** Python, SQL, C++
- **ML / AI:** Machine Learning, NLP, RAG, LLMs, Computer Vision, Hyperparameter Tuning
- **Libraries / Frameworks:** Pandas, NumPy, Scikit-learn, OpenCV, spaCy, Sentence Transformers, Flask
- **Tools / Platforms:** FAISS, Git, AWS, Power BI, Excel

CERTIFICATIONS

- **AWS Cloud Practitioner:**
- **MKCL Advanced Excel:**
- **MKCL Digital Marketing:**

EXTRACURRICULAR ACTIVITIES

- **Social Media Head, TEDxKKWIEER:** Led social media strategy and content for event promotion and outreach, reaching **300K+ people** and generating **4M+ views** during the tenure.
- **Social Media Lead, Phoenix KKW Club:** Contributed to social media strategy, content creation, and digital outreach for club initiatives and events.
