EDUCATION

- **K. K. Wagh Institute of Engineering Education & Research** Nashik, India
B.Tech in Artificial Intelligence and Data Science Expected 2027
- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Database Management Systems, Artificial Intelligence, Operating Systems

PROJECTS

- **ContractLens – Privacy-Safe AI for Legal Contract Risk Detection:** Built a RAG-based system that flags high-risk clauses in legal contracts (employment, rental, loan, NDA) and explains them in plain language. Owned the privacy layer and backend architecture: designed the PII detection and masking pipeline (Microsoft Presidio, spaCy, Regex) so sensitive data is anonymized before any text reaches the LLM. Clauses are embedded with Sentence Transformers, indexed in FAISS, and retrieved for context-aware risk classification via a custom RAG pipeline. *Python, LLMs, RAG, FAISS, Sentence Transformers, Presidio, spaCy, PyMuPDF*
- **Attendify – Dual-Verification Smart Attendance System:** Automated classroom attendance using face recognition plus Wi-Fi device verification, marking a student present only when both checks pass. Worked as ML & Data Engineer: trained and tuned the face recognition model (FaceNet embeddings), and built the enrollment data cleaning and MAC-address/database pipeline feeding the verification logic. *Python, OpenCV, FaceNet, Flask, SQL*
- **Planify – Smart Route Finder:** Web app that finds and ranks all possible travel routes between two cities. Designed and implemented the core backend algorithm: modeled cities/routes as a weighted graph and used Depth-First Search to enumerate paths, then ranked routes by cumulative time and distance to surface the optimal one. *Python, Flask, Graph Traversal (DFS), Jinja*
- **Car Price Prediction Model:** End-to-end regression pipeline to predict used-car prices from listing data. Handled data cleaning and feature engineering (categorical encoding, outlier handling, derived features) and applied hyperparameter tuning to improve model performance over a baseline. *Python, Pandas, NumPy, Scikit-learn*

ACHIEVEMENTS

- **Registered Design Patent – Government of India:** Co-designer on "Legal Case Tracking AI-Device", registered with the Design Office, Intellectual Property India (Design No. 461520-001, Class 14-02), grown out of the ContractLens project.

SKILLS

- **Languages:** Python, C++, SQL **Libraries:** Pandas, NumPy, Scikit-learn, spaCy
- **ML/AI:** NLP, RAG, LLMs, FAISS, Sentence Transformers, Hyperparameter Tuning **Tools:** Flask, Git, AWS, Power BI, Excel

CERTIFICATIONS

- AWS Cloud Practitioner MKCL Advanced Excel MKCL Digital Marketing

EXTRACURRICULAR ACTIVITIES

- **Social Media Head, TEDxKKWIEER:** Led social media strategy and content for the TEDx chapter's event promotion and outreach.
- **Member, Phoenix KKW Club:** Active member contributing to club initiatives and activities.
